Forecast for Tuesday 30 May 2023

Weather: Clear skies through the early hours but some patchy low cloud may develop by dawn. Some cloud lingering through the first part of the morning, but with sunny spells likely too. Turning mainly sunny by the afternoon with blue skies and unbroken strong sunshine likely for the remainder of the day. Breezy with some gusty winds at times, even to lower levels.

Chance of cloud-free hill tops above 600m: 60% becoming 100%.

Low cloud and visibility: Periods of cloud above around 500m at dawn, this lifting and clearing during the morning with all cloud dispersing by late morning. Locally very poor visibility in cloud at first, but soon becoming widely very good for the rest of the day. However distant hills and landmarks may appear rather hazy.

Meteorologist's View

Very high UV levels are expected on Tuesday, so despite it perhaps not feeling particularly hot due to the brisk breeze on the summits, remember to protect yourself from the harmful UV rays and stay hydrated. The highest chance of low cloud on Tuesday morning will be across the Black Mountains and in the east of the National Park.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Wednesday 31 May 2023

Weather: Cloud returning from the east during the early hours, this perhaps more extensive than it was on Tuesday morning. A cloudy start to the day with the cloud somewhat slower to lift and break. However, sunny spells developing by the afternoon with a sunny remainder to the day.

Maximum wind: Northeasterly or easterly 20 mph gusting 30-35 mph.

Chance of cloud-free hill tops above 600m: 30% becoming 90%.

Low cloud and visibility: Extensive cloud above 450-550m at first, lifting to 600m and then clearing by early afternoon. Very poor visibility in cloud but becoming very good although distant hills appearing rather hazy.

Temperature: **Valleys:** Plus 4 Celsius becoming plus 22 Celsius.
At 600m: Plus 4 Celsius becoming plus 14 Celsius.
Freezing level: Well above the summits.
